

One-Time: Liquidation

This option is ideal for one-time disposals, such as closing down one of your locations. Simply send an email to sales@rpcglobal.net, and we'll make an offer to buy your excess electronics. If a deal is reached, we will pay for the equipment and remove it from your facility. Transfer of Ownership will pass to RPC Global.

Ongoing: Value Recovery

This is the perfect solution when you require an ongoing disposal solution. Your IT assets will be collected from your various locations and brought to our facility in Houston, TX, where they will undergo a thorough sanitization process, including data destruction. Transfer of Ownership to RPC Global begins at the scheduled date of collection. Afterward, the equipment will be tested in-house by our technicians and assigned a dollar value based on its condition. To maximize its value the units will be paid as follows:

- **High-Dollar Items:** Items such as servers, networking switches, and data-storage devices will be priced individually and paid according to FMV (Fair Market Value)
- **Flat-Rate Pricing:** Items such as PCs, laptops, and monitors will be paid a flat-rate according to their specifications
- **Peripherals:** Items such as keyboards, mice, and cables will be weighed and paid by the pound
- **Non-working / Obsolete Equipment:** No value. Will be recycled at no charge
